IT

Il nuovo ripiano Strike 50 è un'evoluzione dell'ormai storico ripiano in Alluminio di Scilm.

Rispetto alla precedente versione lo spessore di 50 mm lo rende perfetto in applicazioni che richiedono dimensioni più grandi, come ad esempio dispense, armadi e cabine armadio.

Il ripiano può essere utilizzato in ambo i lati.

Nella prima versione il pannello di legno o vetro sarà in appoggio e risulterà in linea con il profilo perimetrale d'Alluminio, la seconda versione è caratterizzata da un contenimento di 3 centimetri, ottimo in cucina o all'interno di madie e vetrinette.

Altra novità è la possibilità di rendere il ripiano estraibile conferendo al ripiano ancor più versatilità.

EN

The new Strike 50 shelf is a development of Scilm's classic aluminium shelf.

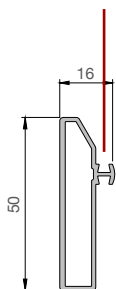

Compared to the previous version, its thickness of 50 mm makes it ideal for applications that require larger dimensions, for example, storage units, cupboards and walk-in wardrobes. The shelf can be used on both sides.

In the first version, the wood or glass panel is supported and flush with the aluminium outer profile, whereas the second features a 3-centimetre storage space, which is optimal in the kitchen or inside cupboards and glass cabinets.

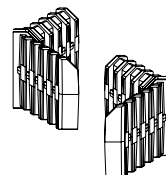

An additional new feature is the option of having a removable shelf, thus making it even more versatile.
