WE CARE

Zefiro garantisce una portata d'aria superiore, offrendo massima libertà di progettazione anche con forni, cantinette e gasatori installati sotto il piano cucina. Il miglior raffreddamento assicura prestazioni ottimali, limita rumorosità e usura e consente di ridurre fino al 10% i consumi energetici degli elettrodomestici.

Zefiro guarantees superior airflow, offering maximum design freedom even with ovens, wine coolers, and sparkling water systems installed under the kitchen countertop. Improved cooling ensures optimal performance, reduces noise and wear, and can deliver energy savings of up to 10% for appliances.

Più aria
More airflow

Maggiore efficienza
Higher efficiency

Libertà di progettazione
Design freedom

Meno rumore e minore usura
Reduced noise and wear-and-tear

Fino al 10% di risparmio sui consumi degli elettrodomestici
Up to 10% energy savings for appliances

Test report issued under the responsibility of VDE.
Zefiro was tested with a combo unit (freezer + refrigerator) at 32°C for 48 hours and compared with the same combo unit operating without Zefiro at 32°C for 48 hours.

Test voltage 230V 50Hz.

Test performed with built-in installation, with only a 1 cm opening along the entire top side of the combo unit, and with Zefiro installed underneath the base of the unit.

	WITHOUT ZEFIRO	WITH ZEFIRO
Refrigerator temperature	**FROM 6,9° to 8,4° C**	**FROM 5,4° to 7,4° C**
Condenser coil inlet temperature	**67,0°**	**59,5°**
Energy consumption	**1354,2 Wh/day**	**1195,1 Wh/day (-10%)**
