

ANTA 2640

DOOR 2640

IT

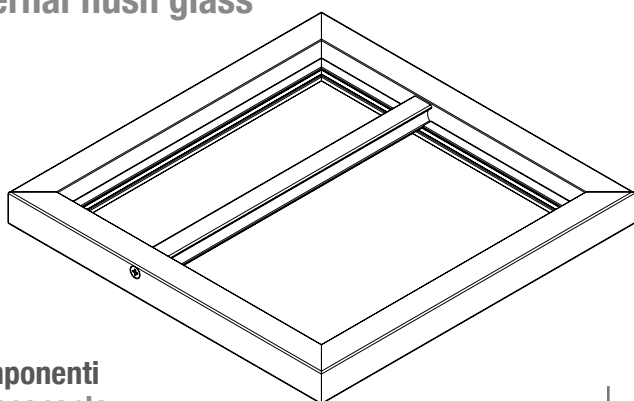

Scilm ha studiato un nuovo profilo anta in alluminio utilizzabile da ambo i lati con cerniera ad incasso. Questo permette di creare due ante con un'estetica diversa utilizzando lo stesso profilo. La prima con un aspetto più pulito e minimal ha il vetro a filo con il perimetro esterno dell'anta. La seconda con il frontale rientrante è caratterizzata da una maniglia posizionabile in verticale o orizzontale lungo tutta la lunghezza dell'anta, donando al prodotto un carattere forte e un tratto distintivo.

EN

Scilm has developed a new aluminium door profile that can be used on both sides with a recessed hinge. This enables you to create two doors with different aesthetic characteristics using the same profile. One version, with a cleaner, more minimalist appearance, has glass flush with the outer perimeter of the door. The other, with a recessed front, features a handle that can be positioned either vertically or horizontally along the entire length of the door, endowing the product with a striking character and distinctive appeal.

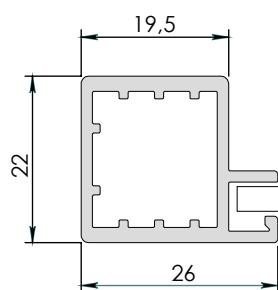

SPECIFICHE E CARATTERISTICHE - SPECIFICATIONS AND FEATURES

Vetro filo rientrante Internal flush glass

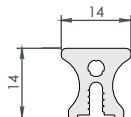

Componenti Components

ART. 2640

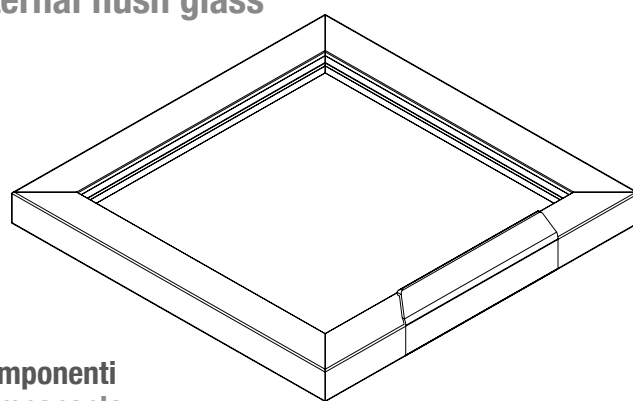

Vetro spessore 4 mm
Glass thickness 4 mm
