TECNOLOGIA PER MOBILI

A history of people, ideas and work.

About us

Scilm, which stands for “Società Commerciale Industria Lavorazione Metalli” (Metalworking company), was founded in 1977, more than 40 years ago, by two skilled men:

Their question – “How can we simplify the kitchen experience?” – soon became an obsession. Then an innovation. Then a patent. And another. And yet another.

Today, the new generations, are still asking that question, turning it into a “system” of solutions: a world of visible and invisible parts and aluminium and plastic products that make each detail something special. The result makes the environment you love simpler, more functional, more beautiful, more Scilm.

2022 <ul style="list-style-type: none">• Scilm America headquarters moves to Charlotte• FSC certification	2023 <ul style="list-style-type: none">• New shipment warehouse• Audit SMETA• Whistleblowing	2024 <ul style="list-style-type: none">• Acquisition of 100% of the shares in Euro Orvel• Lean project in the aluminium department	2025 50001 certification	

How can we simplify the kitchen experience?

We supply products that are innovative in terms of design, technology and Italian style. We have specific expertise in processing plastic and aluminium.

We work in partnership with our customers, developing projects tailored to their needs. We build long-term business relations based on mutual esteem and friendship.

We bring to the world the know-how and style developed together with our Italian and European customers.

We provide an excellent customer service based on a full range of products, technical assistance and quick and timely deliveries.

Our certifications

ISO 9001:2015 - 14001:2015

Scilm has obtained ISO 9001-2015 and ISO 14001-2015 certifications, testifying that its operational processes are carried out in compliance with quality parameters and proper environmental management.

FSC Certification | FSC-C180581

The system that documents and tracks the raw materials used in production processes and in end products to ensure that the FSC-certified products marketed by Scilm meet the requirements of the FSC standard

ISO 14021:2016 Certification

The standard that authorises the issuing of self-declared environmental product claims directly by the certified company. SGS validated Scilm's self-declared environmental claim regarding the recycled material content (>25%) of profiles in extruded PVC.

Safety at work

Safety Management System based on UNI-INAIL Guidelines with the aim of guaranteeing the achievement of the health and safety goals the company has set itself.

“We care” has been in operation for 40 years.

We want to continue to expand worldwide as a successful Italian manufacturing company that offers furniture manufacturers, particularly kitchen manufacturers, solutions and designs that functionally and aesthetically complement their products in tune with the design trends and lifestyles of contemporary families.

It comes naturally to us to be ahead of the times, from the innovation of the first plastic plinth to 20-year sustainable choices such as lead-free PVC or recyclable aluminium. Since 1977, our idea of furniture has been based

on increasingly cutting-edge materials, tools for designers that are more intuitive, as well as attractive and practical solutions for the kitchen. Today, half of our products are exported thanks to a footprint that has created a standard.

Our values.

Integrity

We work with integrity in accordance with legislation, suppliers, customers, employees and stakeholders.

Respect for individuals

We believe in the people who collectively make up Scilm and we believe that we can work safely.

Focusing on results

We nurture the working environment and the development of personal and professional skills, providing the best hardware and software tools to achieve results for our company.

Involvement

We believe that all employees can contribute to the success of the company and we encourage active participation and involvement in its management.

Social responsibility

We are a socially responsible company that focuses on sustainability. We contribute to the economic and cultural development of our community and our local area.

Company policy

Scilm Management has updated the Company Policy for Quality, Environment and Occupational Health and Safety. This is an important document explaining Scilm's commitment to its customers, the environment and its employees.

Ethical code

Its purpose is to always remind everyone of the spirit of the company and the reason why it was established.

We put ourselves in the shoes of designers, fitters and users.

Areas of application

- Industrial and artisan manufacturers of home, outdoor and office furniture.
- Manufacturers of industrial furniture and the metalworking industry.
- General Contractors.
- Distributors and retailers of components for the furniture industry.
- Planning, architecture and design studios.

Industrial expertise

1

Plastics

- › Injection moulding
- › Thermoforming
- › Extrusion

2

Aluminium

- › CNC machining
- › Mechanical processing of coils
- › Anodizing

3

Metal alloys

- › Stamping by blanking

4

Coating

- › Paper
 - › Laminates
 - › Aluminium
 - › Wood veneers
-

5

Assembly

- › Tables
- › Doors
- › Furniture components

6

Packaging

- › Boxes
- › Bags
- › Blister packs

7

Custom-sizing

- › Catalogue product kits
- › Reference doors
- › Furniture components

Technology for furniture

Scilm has innovated the concept of kitchen cabinets, providing designers with new ways of creating living spaces.

| 13 Technical bases | 14 Legs | |

Our commitment for a more sustainable future.

Innovation for the well-being of the environment, people and the local area.

For Planet

We are constantly looking for production solutions that preserve natural resources and counteract climate change. By using recycled raw materials, reducing waste and choosing renewable energy sources, we contribute to a development model that respects the ecosystem.

For People

The quality of life of Scilm's employees is at the heart of all our company policies. We strive to spread the culture of health and safety and create a work environment that is not only stimulating on a professional level but also collaborative, inclusive and respectful of diversity.

For Work

Sustainability must be a collective commitment: only together can we reinforce eco-sustainable dynamics and processes. As part of a community sharing a single planet, we work to increase the environmental awareness of all our production partners by promoting careful and responsible management of the supply chain.

Sustainability strategy and budget

By reporting on our sustainability performance on a yearly basis, we can monitor the internal and external effects of our activities and steer their progress by defining strategies and implementing structured policies accordingly.

For many years, at Scilm we have been making careful choices concerning our environmental impact, the well-being of our employees and the society in which we work.

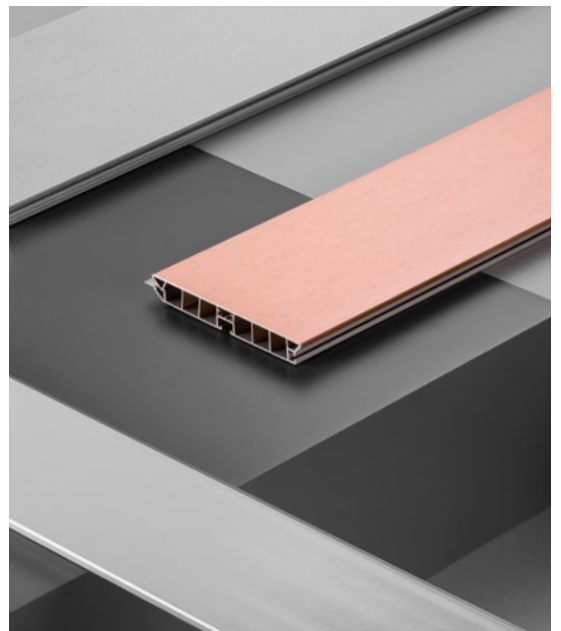

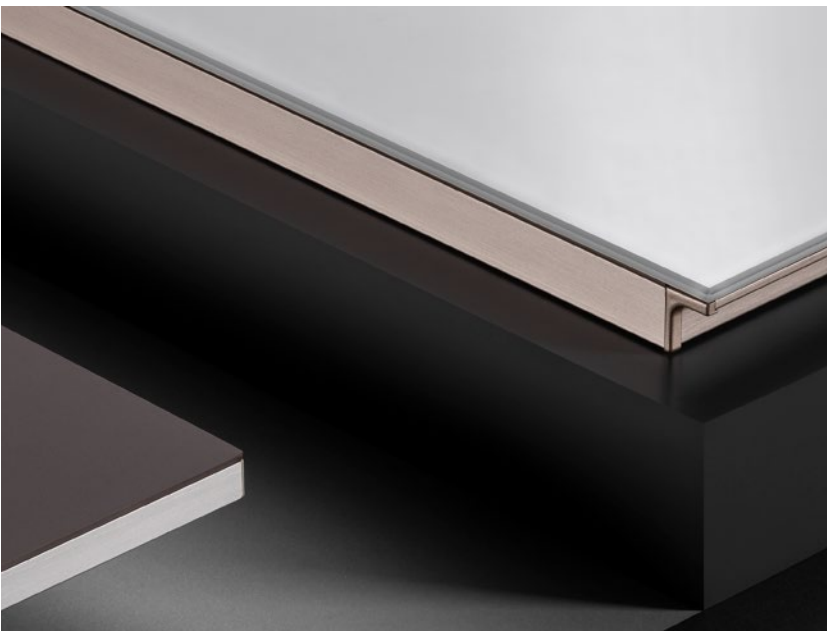

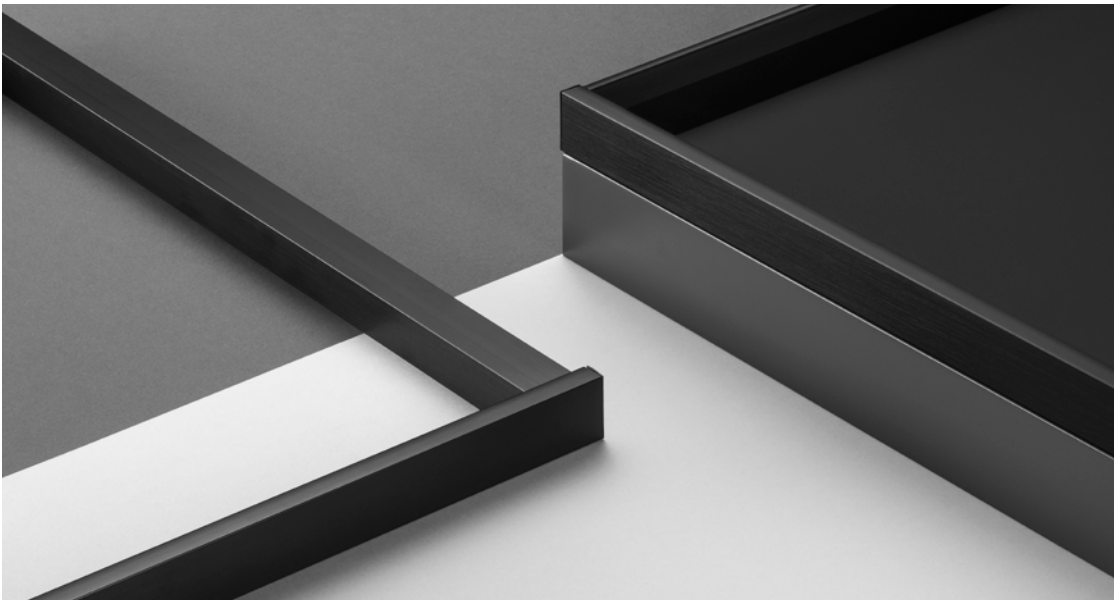

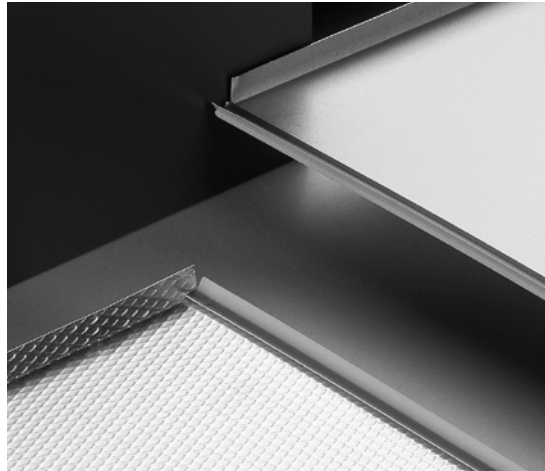

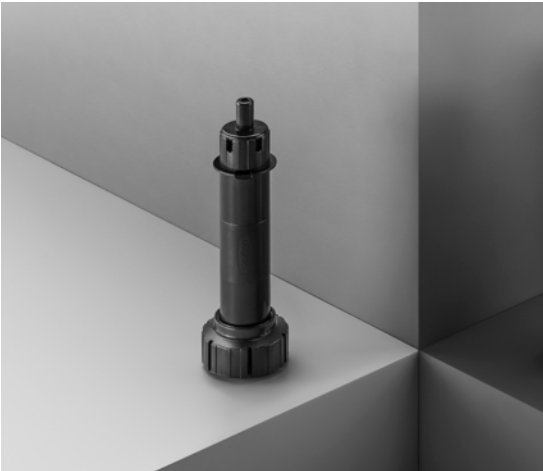

We are aware, however, that we can do more and better.

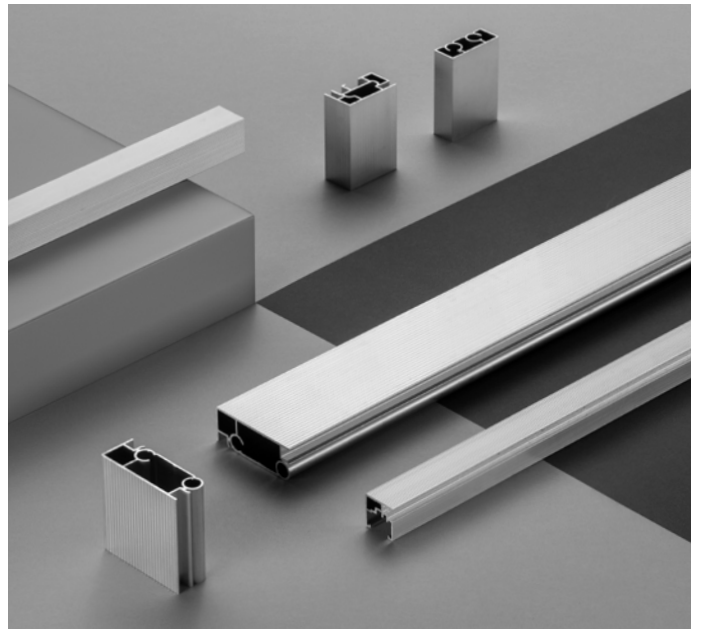

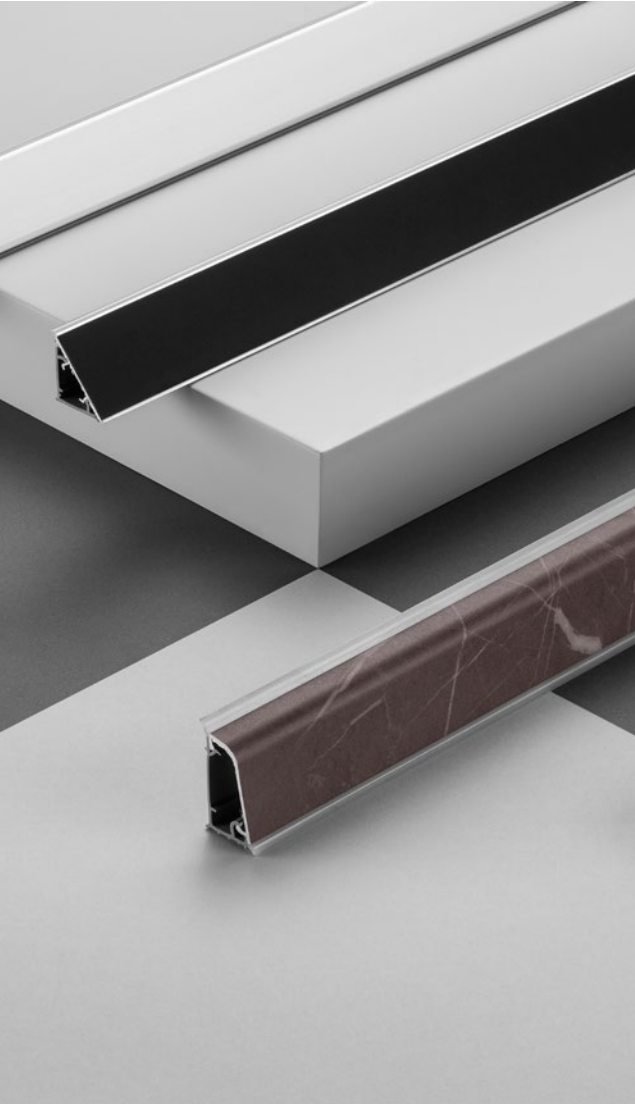

We are therefore now formally committed to sharing our results and targets in the most transparent way possible, trying to improve year by year.
