

The
world
of
scilm

A history of people, ideas and work.

About us

Scilm, which stands for “Società Commerciale Industria Lavorazione Metalli” (Metalworking company), was founded in 1977, more than 40 years ago, by two skilled men:

Their question – “How can we simplify the kitchen experience?” – soon became an obsession. Then an innovation. Then a patent. And another. And yet another.

Today, the new generations, are still asking that question, turning it into a “system” of solutions: a world of visible and invisible parts and aluminium and plastic products that make each detail something special. The result makes the environment you love simpler, more functional, more beautiful, more Scilm.

La nostra storia

Our numbers

5 Our premises.	180 Our collaborators.	70 Countries to which we export.	50/50 Our turnover in Italy and abroad.	30% Turnover from customised projects.
28.000 sq.m Covered surface area.	30.000 Codes handled every year.			

Ci presentiamo

1977 Loris Beghetto and Paolo Scudiero turn an idea into Scilm.	1980 The innovative artificial resin-coated plinth is born.	1988 The new Gola profile system is launched.	1990 New headquarters opens in Cittadella.	1994 Scilm is the 6th company in Italy to obtain ICILA, UNI EN ISO 9001 certification.
1998 Oxidal joins the Scilm Group.	2006 Scilm launches the new Catenaria profile system.	2009 A generational transition takes place at Scilm.	2010 Scilm obtains 14001 Environmental and Occupational Safety certification.	2011 Scilm America is founded and Plan.a is launched.
2015 Scilm and Euro Orvel join forces to expand in the cabinet sector.	2016 A code of ethics is introduced.	2017 Scilm celebrates its 40th anniversary.	2019 Blink, the magnetic clip, receives an Interzum Award.	2021 A new acceptance warehouse and a factory extension for Euro Orvel.
2022 Scilm America headquarters moves to Charlotte and obtains FSC certification.	2023 New shipment warehouse and 50001 certification.			

How can we simplify the kitchen experience?

We supply products that are innovative in terms of design, technology and Italian style. We have specific expertise in processing plastic and aluminium.

We work in partnership with our customers, developing projects tailored to their needs. We build long-term business relations based on mutual esteem and friendship.

We bring to the world the know-how and style developed together with our Italian and European customers.

We provide an excellent customer service based on a full range of products, technical assistance and quick and timely deliveries.

Our certifications

Company policy

Scilm Management has updated the Company Policy for Quality, Environment and Occupational Health and Safety. This is an important document explaining Scilm's commitment to its customers, the environment and its employees.

ISO 9001:2015 - 14001:2015

Scilm has obtained ISO 9001-2015 and ISO 14001-2015 certifications, testifying that its operational processes are carried out in compliance with quality parameters and proper environmental management.

Code of ethics

Its purpose is to always remind everyone of the spirit of the company and the reason why it was established.

Safety at work

Safety Management System based on UNI-INAIL Guidelines with the aim of guaranteeing the achievement of the health and safety goals the company has set itself.

"We care" has been in operation for 40 years.

We want to continue to expand worldwide as a successful Italian manufacturing company that offers furniture manufacturers, particularly kitchen manufacturers, solutions and designs that functionally and aesthetically complement their products in tune with the design trends and lifestyles of contemporary families.

It comes naturally to us to be ahead of the times, from the innovation of the first plastic plinth to 20-year sustainable choices such as lead-free PVC or recyclable aluminium. Since 1977, our idea of furniture has been based

on increasingly cutting-edge materials, tools for designers that are more intuitive, as well as attractive and practical solutions for the kitchen. Today, half of our products are exported thanks to a footprint that has created a standard.

Our values.

Integrity

We work with integrity in accordance with legislation, suppliers, customers, employees and stakeholders.

Focusing on results

We nurture the working environment and the development of personal and professional skills, providing the best hardware and software tools to achieve results for our company.

Social responsibility

We are a socially responsible company that focuses on sustainability. We contribute to the economic and cultural development of our community and our local area.

Respect for individuals

We believe in the people who collectively make up Scilm and we believe that we can work safely.

Involvement

We believe that all employees can contribute to the success of the company and we encourage active participation and involvement in its management.

We put ourselves in the shoes of designers, fitters and users.

Areas of application

- Industrial and artisan manufacturers of home, outdoor and office furniture.
- Manufacturers of industrial furniture and the metalworking industry.
- General Contractors.
- Distributors and retailers of components for the furniture industry.
- Planning, architecture and design studios.

Technology for furniture

Scilm has innovated the concept of kitchen cabinets, providing designers with new ways of creating living spaces.

1 Aluminium structures

2 Aluminium and thermoplastic resin backsplashes

3 "Strike" aluminium and glass shelves

4 Aluminium and thermoplastic resin plinths

7 Sink cabinet protector in aluminium and thermoplastic material

10 Horizontal Gola profiles

13 Refrigerator bases

5 Plinth clips and magnetic plinth clips

8 Aluminium doors

11 Vertical Gola profiles

14 Legs

6 Protection for induction hobs with insulating material

9 Plan. System aluminium doors

12 Aluminium Catenaria profiles

Our commitment for a more sustainable future.

Innovation for the well-being of the environment, people and the local area.

For Planet

We are constantly looking for production solutions that preserve natural resources and counteract climate change. By using recycled raw materials, reducing waste and choosing renewable energy sources, we contribute to a development model that respects the ecosystem.

For People

The quality of life of Scilm's employees is at the heart of all our company policies. We strive to spread the culture of health and safety and create a work environment that is not only stimulating on a professional level but also collaborative, inclusive and respectful of diversity.

For Work

Sustainability must be a collective commitment: only together can we reinforce eco-sustainable dynamics and processes. As part of a community sharing a single planet, we work to increase the environmental awareness of all our production partners by promoting careful and responsible management of the supply chain.

This year-long project aims to rationalise all packaging.

In 2021, Scilm began an important journey to optimise the packaging used in an eco-sustainable way. The solutions adopted have enabled us to reduce our environmental impact in this field while maintaining a high level of protection for the products we ship.

Researching alternative materials

Our main goal was to gradually phase out polystyrene, a material with a high environmental impact, which is difficult to re-use and expensive to dispose of, replacing it with eco-compatible materials.

Reduction in variety

We have made a gradual transition from plastic (PP or PE) to paper/ cardboard in order to reduce the environmental footprint and facilitate composting. Where this was not possible, we switched from virgin plastic to regenerated plastic.

Reduction in quantity

We have focused on reducing the thicknesses of plastic films in order to limit the use of this material, and generally to reduce packaging that is not strictly necessary.
