

Led Gola Profile Program

Programma Profili Gola Led

LED GOLA PROFILE
PROGRAM

Nel mondo della cucina contemporanea, dove estetica e funzionalità si fondono in un equilibrio sempre più raffinato, il Programma Gola LED rappresenta una soluzione capace di dare forma e luce all'ambiente.

I profili sono disponibili orizzontali e verticali, questi si distinguono per la possibilità di integrare una striscia LED (non fornita da SCILM) completata da un opalino diffusore, fornito a catalogo, che uniforma e ammorbidisce l'effetto luminoso.

In the contemporary kitchen world, where aesthetics and functionality come together in an increasingly refined balance, the LED Gola collection is an effective solution for adding shape and light to the kitchen.

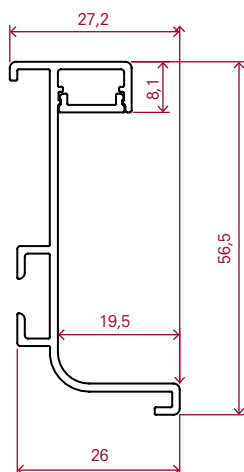

Horizontal and vertical profiles are available, which stand out thanks to the option of integrating a LED strip (not supplied by SCILM), complemented by an opaline diffuser, included in the catalogue, which harmonises and softens the luminous effect.

TIPOLOGIE DI GOLE A LED / LED GOLA PROFILES

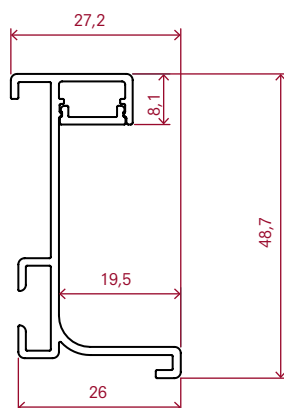

Gole orizzontali sotto-top

Under-top horizontal gola profiles

La luce diventa così un vero e proprio segno architettonico, un tratto minimale che accompagna le linee del mobile, valorizzando i volumi senza appesantirli. La presenza del LED, discreta ma efficace, consente di illuminare la zona operativa senza la necessità di accendere l'impianto principale: una scelta funzionale, sostenibile e di grande impatto estetico.

Il Profilo Gola LED è pensato per chi ama la pulizia formale ma non vuole rinunciare alla tecnologia, per chi cerca soluzioni eleganti, ma anche intelligenti.

Perfetto per cucine di ultima generazione, trova spazio anche in altri contesti, come cabine armadio o zone living, dove la luce integrata esalta l'architettura del mobile e crea atmosfera.

**Una piccola aggiunta, per un grande effetto:
il dettaglio che illumina il design.**

The light therefore becomes a true architectural feature, a minimalist detail that accompanies the lines of the cabinet, enhancing volumes without overburdening them. The subtle yet effective LED light ensures that the work area is lit up without having to switch on the main lighting system: a functional, sustainable and aesthetically attractive choice.

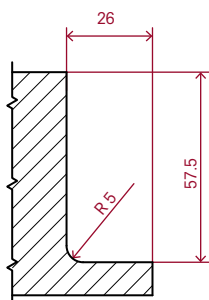

The LED Gola profile is designed for those who love formal elegance but prefer not to compromise on technology, for those looking for elegant yet smart solutions.

Perfect for latest generation kitchens, it also fits into other contexts, such as walk-in wardrobes or living areas, where an integrated light enhances the architectural style of the furniture and thus sets the mood.

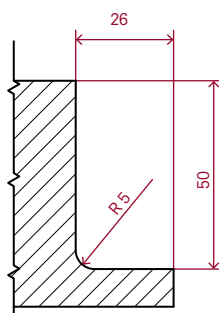

**A small addition with a huge effect: the detail
that lights up the design.**
