

# ZEFIRO

**More air, better  
performance.**

**Zefiro is the first device that improves  
the ventilation of built-in household  
appliances in the kitchen.**

With its patented forced air and smart  
control system, Zefiro allows household  
appliances to operate in optimal conditions  
while improving efficiency and durability.

# ZEFIRO

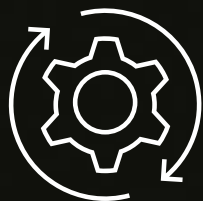

## Higher airflow rate

The guaranteed airflow is higher than the required 200 cm<sup>2</sup>.

## Longer life

Better conditions for the durability of the household appliance.

## Increased efficiency

The household appliance works in optimal conditions.

## Reduced energy consumption

Optimum use allows the household appliance to be energy efficient.
